## Professional Profile

Full Stack Developer with solid academic experience and group projects. Specialized in Front-End development with advanced skills in **React.js**, **Next.js**, **Tailwind CSS**, **React Native** and **TypeScript**, among other modern technologies. Continuously learning, I completed bootcamps at Digital House (2023) and Henry (2024), gaining deep knowledge of the MERN stack and market-relevant technologies. I excel at creating intuitive user interfaces, designing scalable systems, and collaborating with multidisciplinary teams.

---

## Key Projects

**ForgeFit** (Nov. 2024 - Dec. 2024)

**Role:** Full Stack Developer | Group Academic Project (Henry Bootcamp)

**Description:** Comprehensive platform for gyms, enabling user, class, payment, and content management.

- Developed Front-End features using Next.js, TypeScript, and Tailwind CSS.
- Integrated notifications via EmailJS and dynamic alerts using SweetAlert.
- Designed a relational database with PostgreSQL and TypeORM.

🔗 **Deployed on Vercel**

**Blackvision** (May 2023 - Aug. 2023)

**Role:** Full Stack Developer | Group Academic Project (Henry Bootcamp)

**Description:** E-commerce platform for glasses with features like user registration, shopping cart, purchases, and an admin panel.

- Translated designs into responsive components.
- Managed Sessions and Cookies for authentication and user management.
- Developed the backend and scalable database design using Sequelize.

🔗 **GitHub Repository**

---

## Professional Experience

**Mercado Libre** (2021 - Present)

**Role:** Last-Mile Delivery Operator

- Optimized delivery routes for efficiency in time and cost.
- Managed customer interactions daily, enhancing communication and problem-solving skills.

**ADT Security Services** (Sept. 2014 - Nov. 2019)

**Role:** High-Risk Client Operator

- Negotiated with clients in critical situations to retain services.
  - Consistently met individual and group objectives under performance-based goals.
-
